## Top Reasons Why

### Builders, Contractors, & Homeowners Use MicroPro® Pressure Treated Wood Products

Now available in  
a MicroShades  
**GREEN** color

Treated Wood Process  
Based on  
Life-Cycle Assessment

The MicroPro Treated Wood Process is certified under SCS's Environmentally Preferable Product (EPP) program based on Life-Cycle Assessment.

- First Wood Treatment Process to Receive EPP Status. The Osmose MicroPro technology is the first treated wood process to be certified under SCS's Environmentally Preferable Product (EPP) program based on Life-Cycle Assessment.
- First Wood Treatment Process to Complete Life-Cycle Assessment Studies - The Osmose MicroPro wood treatment process systems were analyzed by Scientific Certification Systems under an exhaustive environmental review process called Life-Cycle Assessment (LCA), in accordance with rigorous international standards set by ISO, the leading international standards setting organization. The MicroPro LCA studies are in compliance with ISO standards 14044 and 14025.
- NAHB Research Center, Green Approved - MicroPro AC2 treated wood products have been approved for points toward National Green Building Certification to the ICC 700-2008 National Green Building Standard.
- Better corrosion resistance for code-approved fasteners and hardware.
- End uses include interior and exterior above ground, ground contact, and fresh water immersion.
- Treated wood warranty programs.\*
- Approved for aluminum contact.\*\*
- Building code compliant. ICC-ES Report, ESR-2240

End Use Classifications for MicroPro Pressure Treated Wood Products	Retention
<b>General Use - Above Ground</b> • decking, joists, beams, and sills	<b>0.06 pcf</b>
